

# Fuel Discount Programming for the Chevron and Texaco Cards

## Verifone POS

### Overview

This document provides configuration changes required on the Verifone POS to add the Chevron-and Texaco-branded card types to allow fuel discount. Stations that offer multi-tier pricing for motor fuel and extend the cash motor fuel price to Chevron- and Texaco-branded card transactions must configure their Verifone POS system to process the cash motor fuel price for mobile app users paying with their Chevron- or Texaco-branded card.

You are responsible for ensuring that the correct value has been entered when programming for any discounted cash price and checking that the discounted amount is applied correctly.

### Information to know before setting up discount:

**1) The PDL the station is using**

Call the Chevron Help Desk and ask for the PDL number that is assigned to the station.

**2) Which Table to use (Table A or Table B or Table C or Table D) based on PDL number**

Look up the station's PDL Number below and use the corresponding Table

PDL Number	Table
6260, 6360, 6361	Table A
6860,6861,6960,6961,6870,6871,6970,6971,6880,6881,6980,6981,6890,6891,6990,6991	Table B
6864,6865,6964,6965,6874,6875,6974,6975,6884,6885,6984,6985,6884,6895,6994,6995	Table C
6963	Table D

## STEP 1: Login to Configuration Manager

- A. On POS Screen, click CSR Func Button

Older Version of UI:

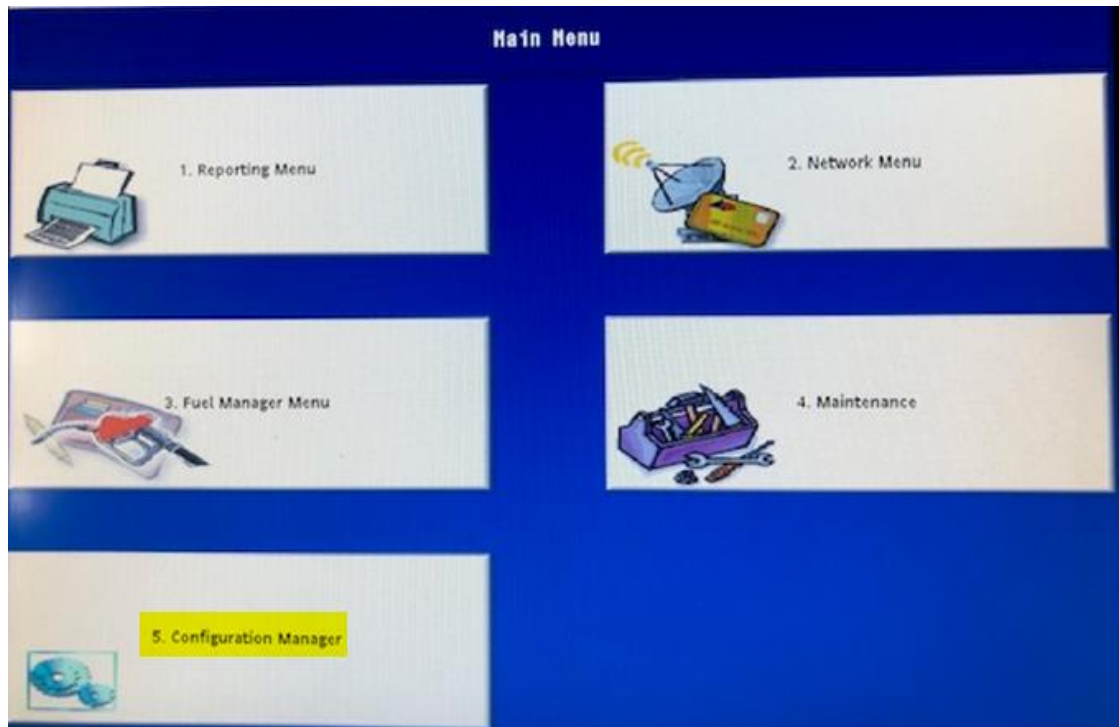

New Version of UI:

B. On the CSR Screen, Click “5. Configuration Manager”.

Older Version of UI:

New Version of UI:

- C. A new login screen will open. Use Manager user account to login to Configuration Manager.

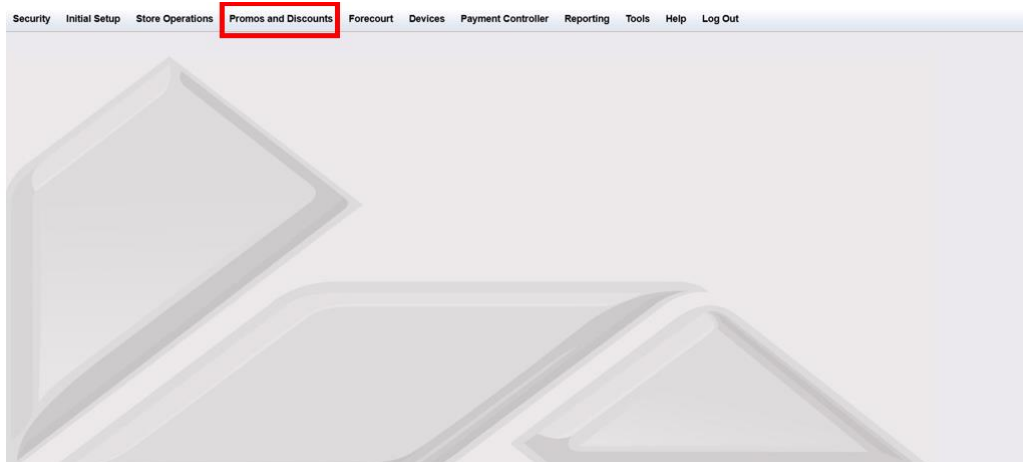

The image shows a login screen titled "Petroleum/C-Store Control Center". It features a "Sign In" section with the following fields and options:

- User Name:** A text box containing "MANAGER".
- Password:** A text box with masked characters (dots).
- Forgot Password?:** A blue link below the password field.
- Language:** A dropdown menu showing "English (US)".
- Sign In:** A button below the language dropdown.

At the bottom of the login box is the VeriFone logo with the tagline "THE WAY TO PAY™".

## Step 2: Navigate to POP Discount

- A. Click Promos and Discounts

## B. Click POP Discount

## Step 3: Ensure “POP Discount Enabled” checkbox is checked.

A screenshot of the 'POP Discount Configuration' screen. The screen has a title bar with 'Save' and 'Cancel' buttons. Below the title bar are tabs: 'Site Params', 'Fuel Discounts', 'POP Discounts' (selected), 'Discount Coupon', and 'POP Options'. The main content area is divided into two sections. The first section, 'Sales Configuration Parameters', has a yellow highlight on the 'POP Discount Enabled' checkbox, which is checked. Below this is a 'POP Discount Mode' section with three radio buttons: 'Basic' (selected), 'Basic + Codes', and 'Basic + Membership'. To the right of these is an orange box labeled 'Basic' containing 'Free Award Security Level' (0), 'Prompt For POP Recalc' (checked), 'Fuel Low Limit' (10.00), and 'Receipt Promo Type' (Unit Price/Gallon selected, Total Savings unselected). The second section, 'Fuel & DCR Site Parameters', has a 'POP Configuration Type' section with 'Standard' (selected) and 'Alternate' radio buttons. To the right are four checkboxes: 'Prompt For Member ID' (unchecked), 'Enable Postpay Member ID' (checked), 'Enable Card Member ID' (checked), and 'Enable Scan Member ID' (unchecked).

## Step 4: Configure “Fuel Discount Definition Table.” This is where to define Discount amt/Gallon (EX: 10c/G).

- Under Fuel Discounts tab, select the first available row and select the grade of fuel which is eligible for this Fuel Discount.
- Use the numpad and enter the discount amount (EX: 0.100 For 10c/G)
- Repeat the step for all eligible grades on the same row (Same Def#).

Note: If you have Keyboard connected to POS, you can directly make changes to fuel price. Below keyboard window appears if you are using virtual keyboard.

## Step 5: Configure POP discount for Chevron cards.

- A. Under POP Discounts tab, find the first open “Pop Number” by clicking on the drop-down menu

The screenshot shows the 'POP Discount Configuration' window with the 'POP Discounts' tab selected. The 'POP Number' dropdown menu is open, displaying a list of numbers from 10 to 20. The 'POP Description' field is empty. The 'Schedule Type' is set to 'By Date'. The 'Schedule By Date' section shows 'Start Date & Time' as 1/18/19 and 'End Date & Time' as 1/2/24. The 'Award Type' is set to 'Discount'. The 'POP Discount Definition ID' is set to 1.

From version 08.54.02.01, POP Number has been increased from 25 to 50.

The screenshot shows the 'POP Discount Configuration' window with the 'POP Discounts' tab selected. The 'POP Number' dropdown menu is open, displaying a list of numbers from 17 to 50. The 'POP Description' field is empty. The 'Schedule Type' is set to 'By Date'. The 'Schedule By Date' section shows 'Start Date & Time' as 2/27/25 and 'End Date & Time' as 2/27/25. The 'Award Type' is set to 'Discount On'. The 'POP Discount Definition ID' is set to 1. The 'Discount Type' is set to 'Card Type'. The 'Card Discount Type' section shows 'Card Type' as SVSB2BM and 'Show Low Fee Cards' as None. The status bar at the bottom shows 'Status: Connected', 'Site: AB123', and 'IP: 192.168.31.11'.

- B. Assign “POP Description” Name with the name under column 1 (POP Description) in Table A or Table B or Table C or Table D, corresponding to the card record.

Ex: For the Chevron B2B Gift card, use CTB2B as the POP description.

POP Description	Card Type	Card Name
CTB2B	SVSB2BM	Chevron B2B Gift Card
CB2C	SVSB2CCM	Chevron B2C Gift Card

POP Discount Configuration

Save Cancel

Show Low Fee Cards: ☐

☒ None

☐ Mask

☐ Range

Ex: For the Chevron B2B Gift card, select the corresponding card type from Column B of Table A / Table B which is - SVSB2BM from the drop down.

POP Description	Card Type	Card Name
CTB2B	SVSB2BM	Chevron B2B Gift Card
CB2C	SVSB2CCM	Chevron B2C Gift Card

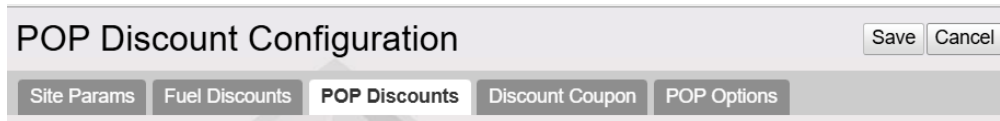

## Step 6: Remove POP discount for Card Type.

- A. To remove any discount for a card type, check the Delete checkbox under POP Discounts tab and click on save. In the below example, steps 1 and 2 was followed to remove the entry of card type represented by the name “CHEVWD74SW”

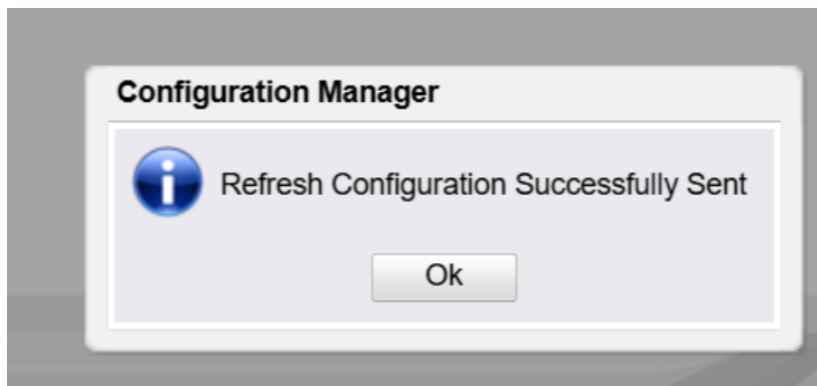

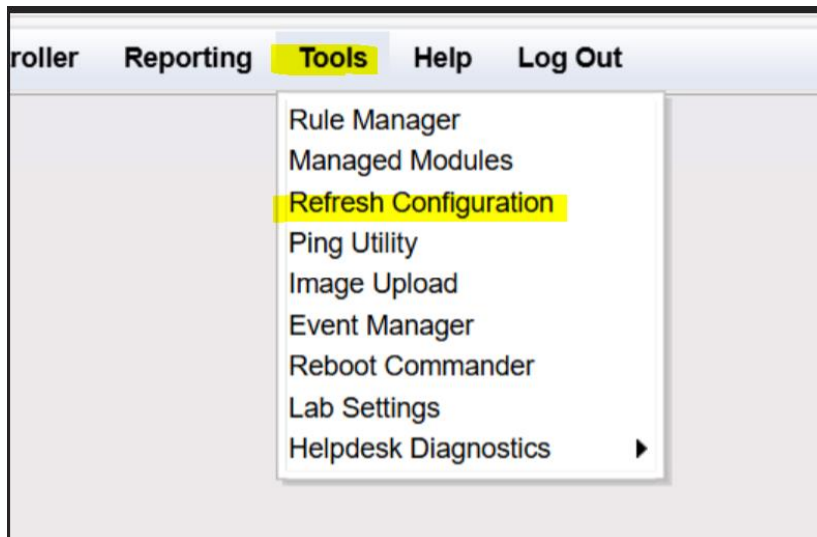

The screenshot displays the 'POP Discount Configuration' window. At the top, there are tabs for 'Site Params', 'Fuel Discounts', 'POP Discounts', 'Discount Coupon', and 'POP Options'. The 'POP Discounts' tab is active. In the top right corner, there are 'Save' and 'Cancel' buttons, with a circled '2' next to the 'Save' button. Below the tabs, there are several sections: 'POP Number' (set to 4) and 'POP Description' (set to 'same as cash'); 'Schedule Type' (radio buttons for 'By Date' and 'By Day of Week', with 'By Date' selected) and 'Schedule By Date' (date and time pickers for 'Start Date & Time' and 'End Date & Time', both set to 2/27/25); 'Award Type' (radio buttons for 'Discount Only', 'Discount or Code', and 'Coupon Only', with 'Discount Only' selected) and 'POP Discount Definition ID' (set to 1); 'Discount Type' (radio buttons for 'PLU', 'MOP', 'Card Type', 'Minimum Purchase', 'Minimum Dept Purchase', and 'Membership', with 'Card Type' selected) and 'Membership Card Required' (set to 'None'); and 'Card Discount Type' (radio buttons for 'None', 'Mask', and 'Range', with 'None' selected) and 'Card Type' (set to 'CHEVWD74SW'). A circled '1' is next to a 'Delete' checkbox, which is checked. The 'Save' button is highlighted in yellow.

**Note: Repeat Step 5: A - F for each card name on Table A / Table B /Table C/ Table D.**

- a. After adding each card record, be sure to click on SAVE at the top of the screen.

- b. After configuring discount for all card records, go to “Tools” and Click “Refresh Configuration”.

- c. Logout from Configuration Manager

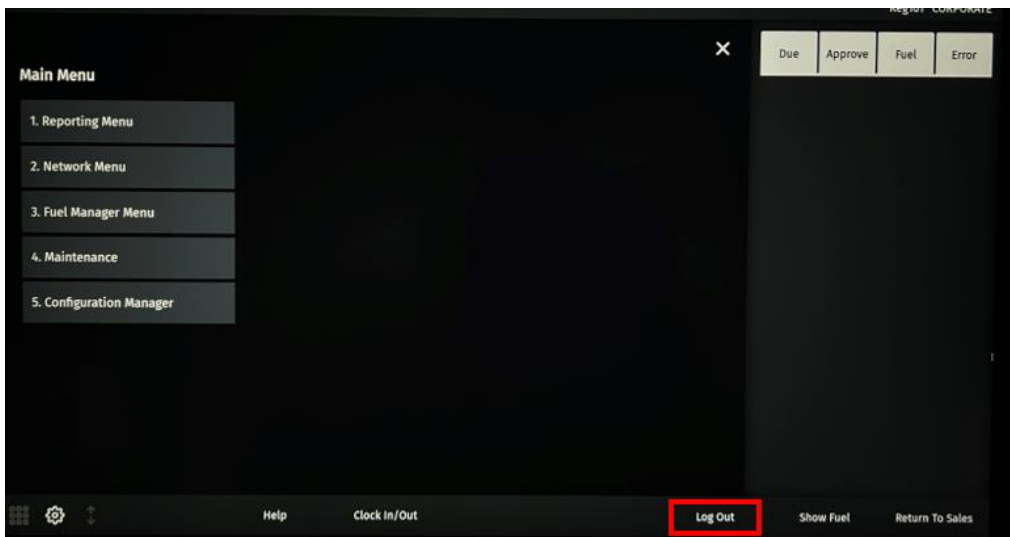

- d. Logout and then Login Back on POS to make sure the discount configuration will be applied for Prepay/Postpay sale.
