

Why should I install fast chargers at my Chevron location?

Our nation's transportation and fueling infrastructure is changing. America's network of public gas stations made it possible for broad ownership and operation of gas-powered vehicles. Now, to prevent emissions and combat climate change, the U.S. is turning to electric vehicles (EVs). A vast, public infrastructure of EV fast chargers is needed to support the demand for EVs and the drivers who will depend on them.

Growing consumer demand and policy support behind EVs make it necessary and profitable to roll out EV charging infrastructure faster than ever before. To succeed, we need to accelerate the process of putting a fast charger in the ground at trusted locations like Chevron.

Why EVgo fast charging?

EVgo is one of the nation's largest public fast charging networks, with over ten years of experience deploying and operating fast charging stations. With EVgo you can attract new visitors, build brand loyalty, and future-proof your business. Enhance the sustainability of your operations and help meet environmental, social and corporate governance goals.

What different types of EV charging does EVgo offer?

EVgo offers fast chargers from 100kW to 350kW. These fast chargers can charge any EV that accepts a fast charge, from LEAFs and BMWs to Bolts and even Tesla Models 3/X/S/Y with a CCS Combo 1 adapter. EVgo fast charging enables EV drivers to charge their vehicles in 15-30 minutes. There are a lot of variables that affect each vehicle's charging speed including the constraints of the vehicle battery, the charging system, the outside temperature, and more.

What are the different EVgo ownership offerings?

Host EVgo fast chargers with [EVgo's owner-operator model](#). Add EVgo-owned fast chargers to your property as an amenity to increase incremental visits and revenue – all at no cost to you.

Or

Own your chargers with [EVgo eXtend](#). Purchase fast chargers and receive all charging revenue plus additional in-store sales, while EVgo handles construction and operations with a turnkey, white label solution. [Learn more](#)

Is EVgo powered by 100% renewable energy?

EVgo has been powered by 100% renewable energy since 2019. For every kilowatt-hour (kWh) consumed on our network, EVgo purchases a corresponding kWh Renewable Energy Credit (REC) from an accredited REC supplier.

Can EVgo support grant funding opportunities?

EVgo is here to help! Applications for NEVI Phase 1 corridor funding began opening in January 2023. Each state oversees its own application, timeline, and review process. With deep policy expertise, comprehensive fast charging solutions, and more than a decade of experience, EVgo is here to help you apply. Our team can evaluate your sites to help determine eligibility and assist in the application process.

How do I know if my Chevron locations are good candidates for EVgo fast charging?

There are a variety of factors to consider depending on if you want to host or own the chargers. To host EVgo fast chargers the site should be able to dedicate approximately 7-9 parking stalls to accommodate charging equipment. The site will need to have landowner and/or tenant consent for charging and utility easements, and be able to sign a 10-year agreement with EVgo. The Chevron location will also have public amenities that include a convenience store and restrooms.

The Chevron retailers best suited to pursue fast charging ownership with EVgo eXtend should be looking to install at minimum of two fast chargers at least five locations. This is a turnkey solution, which includes hardware procurement, construction and five years of operational support.

Do customers have to have an account to charge at EVgo?

Although we encourage EV drivers to become members, either via our Pay As You Go plan, our EVgo Membership plan, or our EVgo Plus with reduced charging rates, customers can also pay for an individual charging session with a credit card. Download the EVgo app or call the EVgo Charging Crew 24/7 for assistance at (877) 494-3833 to execute a credit card session.

Visit our [Sign-Up page](#) to view the plans available in your area and sign up for an account.
