Verifone C-Site Management - Onboarding Commander Release 54.02 and higher

Verifone® C-Site Management web application allows you to remotely configure data for the POS system through the web. Petroleum Merchants and Major Oil administrators can maintain a centralized point for:

- Site data (Registers, PIN Pads, Dispensers, etc.)
- Monitor sites remotely (Tlogs, Summary Reports)
- Centralized hub for configuration for single or multiple sites (Loyalty, Mobile, POS Config.)

Onboarding Commander 54.02 or higher to C-Site:

Once registered with C-Site Management and an account has been setup, to complete the onboarding of the site, you must have access to the Configuration Client at the site.

Once logged into Configuration Client, navigate to the '**Initial Setup**' tab, and then '**Connect to C-Site Mangement**'

Enter the C-Site Management email and password to connect the Verifone Commander to C-Site Management and then click 'Submit'.

If the site doesn't have an account, selecting the 'Don't have an account?' option will provide information for the site to sign up for Verifone C-Site Management.
