

November 2022

Dear Chevron or Texaco Retailer,

Chevron is working with its approved vendor, LSI, to update the Albertsons Gas Rewards and Chevron Texaco Rewards dispenser and column decals at Chevron and Texaco sites. LSI will be removing the current dispenser decals and installing new ones at the pumps. LSI will also remove all existing credit card application holders and take a survey of whether the site offers multi-tier pricing. Lastly, LSI will install column decals at the locations currently participating in the Chevron Texaco Rewards programs. Work will start in early December; we expect the process to take approximately 1-2 hours and have minimal interference with normal operations. Sites should provide the LSI technician a quick review of emergency procedures such as evacuation, rally point, fire extinguishers, and emergency shutoff locations and then allow the technician to proceed with these tasks.

Upon arrival, the LSI technician will:

- Present site with identification and a copy of authorization letter from Desmond Johnson
- Sign in on the vendor log
- Verify your station and facility number
- Carefully cone off and safety tape the work area
- Use LPSA to ensure hazards are identified. PPE will be used, gloves, vest and eye protection
- Remove all debris, safety cones, and safety tape from the work area
- Inform when work is completed and sign out of vendor log

Please note: Work is Low Risk; API certification is not required.

Sincerely,  
Shanna Menezes
