

# It's Time to Upgrade Your POS

**Your Verifone Topaz 310 cannot take advantage of our latest Base 53 software features and is end-of-life. Upgrade now to a C18 and witness your employee and customer engagement increase today.**

Orders can be placed through your local VASC or Verifone Master Distributors:

CBE, Inc. [Verifoneorders@CBE-Inc.com](mailto:Verifoneorders@CBE-Inc.com)  
Excel Equipment [Sales@excel-equipment.com](mailto:Sales@excel-equipment.com)

## Base 53 is Coming

Verifone has developed the latest and greatest software that will allow convenience retailers to improve the cashier experience as they gear up for the latest technologies to optimize towards operational efficiency. All applications built on Base 53 and higher introduce a new user interface (UI) and experience that the Topaz XL 310 is not capable of supporting.

Upgrade to C18 POS to open your world of convenience retailing to new experiences with Base 53 and set your self-up for future successes as new features and enhancements continue to be introduced.

## What's New?

- Support the new C18 workstation
- Support fleet cards and contactless for outdoor EMV
- Enable partial tender amount entry for sales
- Support for 8-digit BINs
- Cashier Prompting, PLU modifiers, ID Checks

## What's Coming?

- Self-Checkout monitoring
- Indoor PayPal / Venmo support
- Age Restriction: multiple ID checks
- Day close optimizations
- System offline reporting

To purchase a C18, contact your local distributor or a Verifone master distributor.

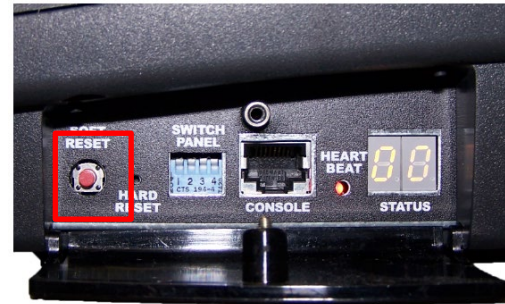

## Important:

Attempting to run a local or remote (VRSD) Auto-upgrade to Base 53 with a Topaz XL 310 connected to the Verifone Zone will cause the upgrade to abort.

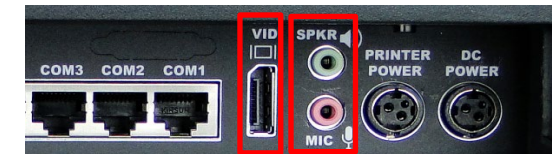

- Any Topaz XL 310s on the network must be permanently disconnected before commencing the upgrade.
- The Topaz XL 410 can run Base 53 and will continue to be supported and serviced.
- See reverse to help identify your Topaz XL version.
