

Chevron's New Payment Gateway

The Future of Retail Agility

Simple – Reliable – Enhanced Payment Processing

Why It Matters – Business Benefits of an Edge-Based Gateway

What

Chevron is migrating all retail sites to a new Payment Gateway, powered by Invenco by GVR's EDGE Pro device. This next-generation solution processes transactions directly at the site, creating faster, more secure, and transparent payment routing while establishing a platform for future retail innovation.

Why Use an Edge-Based Platform for Retail Payments?

- **Platform for Future Capabilities** – Enables mobile payments, loyalty programs, digital receipts, and rapid deployment of new services.
- **Enhanced Supportability & Visibility** – Real-time insight into dispensers, PIN pads, and controllers; improved diagnostics and remote support.
- **Accelerated Innovation** – Standardized APIs, modular architecture, and support for third-party applications.
- **Retailer Empowerment** – Local control for loyalty, promotions, and custom reporting without waiting for central updates.
- **Future-Proofing** – Designed for EMV, contactless, mobile wallets, and scalable for regulatory/security changes.
- **Operational Efficiency** – Consolidates payment routing and device management, reduces complexity, and lowers risk.

EDGE Pro Device

Additional Benefits

Fast Installation – Installation in ~1 hour with only ~5 minutes of site downtime.

No Added Cost to Marketers – Chevron covers deployment; marketers/retailers only need to provide the required switch.

Clear Transaction Visibility – Clearer view into the overall payment process at each site.

Regulatory Readiness – Built to adapt to evolving compliance and security standards.

Built for Scalability – Grows with your business without requiring full system overhauls.

Seamless Migration Path – Retailers can choose their deployment timeframe through 2026.

Chevron's New Payment Gateway

Device Deployment Made Easy

How - 2 Simple Steps

1. Contact the **Invenco Deployment Center** to schedule a site visit for a technician to visit your site (Email ChevronProjectTeam@invenco.com)
2. A certified ASC technician will visit your site and **install your EDGE Pro** device. The Installation will take approximately 1 hour, and your site will be offline for approx. 5 minutes during the cut-over.

Deployment Costs

There are **currently no costs** to marketers or retailers related to the Invenco EDGE Pro deployments. A 24-port network switch is required for system operation and will need to be purchased separately.

Questions

- Search for “Invenco” on Chevron Texaco Station Support
- Or email Invenco directly at reachus@invenco.com.

Ready to get started? Contact the Invenco Deployment center to schedule your site visit today (ChevronProjectTeam@invenco.com).

When

The migration of all Retail Sites to the new Payment Gateway is planned to be completed in 2026.

Currently we are allowing each retail site to select a deployment timeframe that best aligns with their business requirements. However, please note that as the deployment deadline approaches the available deployment timeframe options may be limited.

What is Required

- A 24 Port switch from your MNSP
- POS version:
 - ✓ Gilbarco V20.03 or later
 - ✓ Verifone V08.53.41.02 or later
